Assignment 8.1 - Solution

Dashboard-Style Grid Layout (CSS Grid)

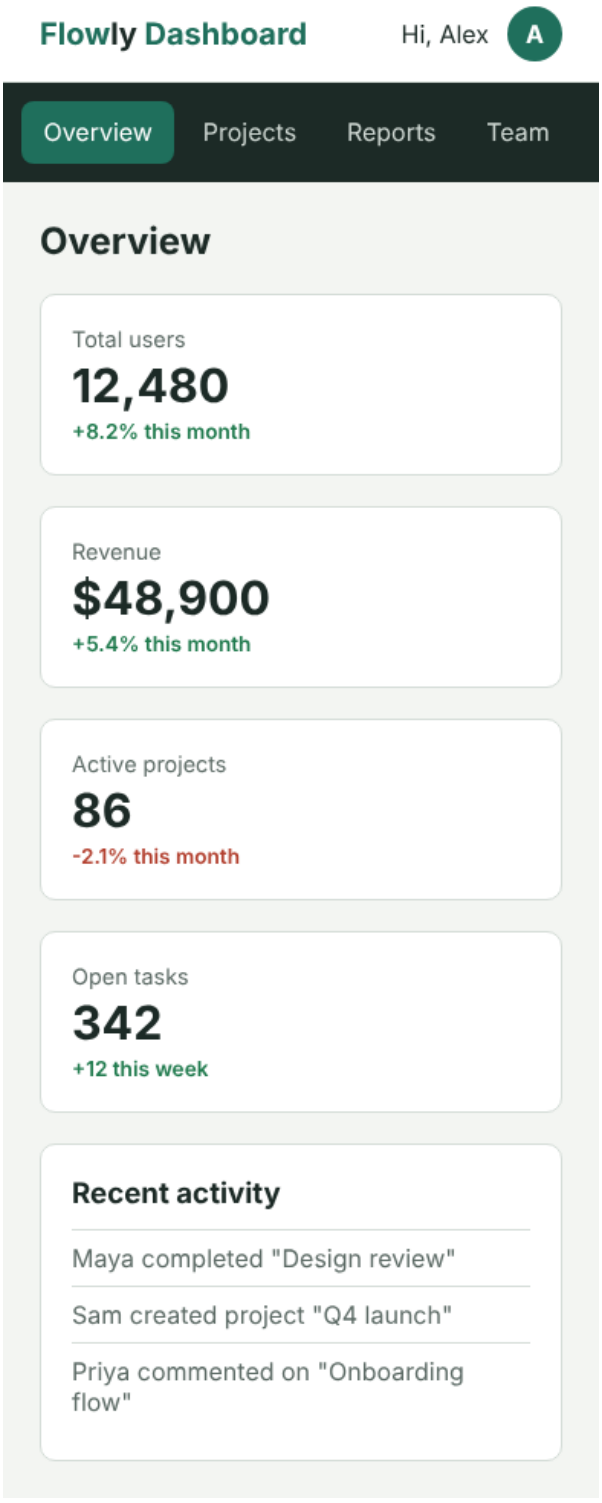

Desktop view (1280px)

Grid inspection view: red = outer grid areas, blue = stat-card grid

Mobile view (390px)

How the requirements are met

1. Header

<header class="header"> spans both columns through **grid-area: header**.

2. Sidebar and main area

<aside class="sidebar"> and **<main class="main">** are placed with **grid-area** names.

3. Statistic cards

Four cards (Total users, Revenue, Active projects, Open tasks) in **.stats**.

4. display: grid on the outer layout

.dashboard { display: grid; }

5. Columns and rows

grid-template-columns: 220px 1fr (sidebar | main) and **grid-template-rows: 64px 1fr** (header | body), with **grid-template-areas** naming the regions. The stat cards use **repeat(4, 1fr)**.

6. Gaps

gap: 1.25rem on **.stats** separates the cards without margins.

7. Inspecting the grid

See the steps below. The overlay screenshot above shows the same grid lines.

Inspecting the grid in the browser (Chrome / Edge)

1. Open **index.html** and press **F12** (or right-click, then Inspect).
2. In the Elements panel, select ** **. A small **grid** badge appears next to it.
3. Click the badge to draw the grid lines, track sizes and gaps on the page.
4. Open the **Layout** tab, tick **Show line numbers** and **Show area names**, and do the same for **.stats**.
5. Resize the window to see the layout change at 1000px and 700px.
